Mötesdeltagare: Magnus Alhmgren - PA
Gerardo Schneider - Examinator
Isac Jansen - Student representative
August Ådahl - Student representative

Adam Lindholm - DNS
Erik Örtenberg - DNS

Protokollförare: Erik Örtenberg - DNS

Ett gemensamt möte har hållits för följande kurser: Om ett gemensamt möte har hållits för flera kurser så ange dessa här.

Sammanfattning

The course had an average and median rating of 3.85 och 4.0 repsectivly according to the course survey. The course survey had an answer frequency of 25.84%, 46 out of 178 responentdts answered. The student representatives thought that the course worked well. One extra positive remark was for the TAs Ali Saaeddin and Alejandro Loque, who received multiple thankful comments from the course survey.

Förkunskaper och lärandemål

Studiesekreteraren nämnde att förkunskaperna hade en bra nivå enligt enkäten. Studentrepresentanterna nämnde att de håller med om det, speciellt med en bakgrund i matematik 5 och matematikspecialisering. Studentrepresentanter nämner även att lärandemålen var tydligt introducerade.

Lärande, examination och kursadministration

There were many positive comments in the course survey regarding the learning in the course. Though some comments mentioned that there were too few TAs. The Examiner mentioned that even

if the course is crowded it's often some students who need a lot of help rather than many people needing a little help.

The exam was altered this year. It was a mix of written questions and multiple choice questions. The Student representatives thought that it worked well.

The Examiner is working together with the other Examiner from another course instance to remove the separate course page and move to the canvas instead of having 2 different course pages.

Arbetsklimat

The workload was fair according to the student representatives.

Regarding Equality, diversity and inclusion, everything seemed to have worked well.

There was a discussion regarding group assignments. The PA suggested that the groups would be randomly allocated. The DNS representative raised the point that all students may not work well together, which can cause friction within the group. The Examiner agreed with that point of view. The meeting agreed with the PA that TKDAT in general needs to improve group dynamics and project work.

Att bevara till nästa kurstillfälle

- The Exam format
- The Labs

Föreslagna förändringar

- * To make the labs more friendly to windows users.
- * To not copy paste exam - it was too easy for some students.
- * The notes on the exam should be made by hand to prohibit copying

Samverkan

No. Not this year. Usually there is a Opera guest lecture.

Övrigt

TA Ali Saaeddin and TA Alejandro Loque got very positive remarks from the survey.
